

## **Health & Safety Policy**

At Chelsea Roofing Ltd, we are committed to maintaining the highest standards of health and safety across all of our operations. We understand the risks associated with roofing work and take a proactive, professional approach to safeguard our team, clients, and the public.

All our roofers are fully trained and equipped with appropriate personal protective equipment (PPE), ensuring safe practices on every project. Regular toolbox talks, site briefings, and risk assessments are conducted to keep safety at the forefront.

We strictly follow the Working at Height Regulations 2005, implementing fall protection systems, scaffold access, and control measures to minimise risk during roof installation and repair tasks.

Public protection is a priority. We use secure fencing, clear signage, and maintain clean, obstruction-free work zones to ensure the safety of residents, pedestrians, and neighbouring properties.

Our company holds full public and employer liability insurance. All work is carried out in accordance with UK Health & Safety legislation, with RAMS documentation available upon request for every job.
